Variety of glasses

Variety of knobs

Portalia CPL interior doors are an integrated, top value-for-money proposal.

Always looking for the most innovative design, the final result highlights the stylish features combined with perfect appearance, creating an excellent point of reference to the space as a whole.

This visual result is characterised by the application of double, adjustable hinges with aluminum caps, for impeccable appearance and increased durability, while one of the main advantages is the synthetic latch bolt of the innovative lock, which eliminates the noise produced when shutting the door.
